

GRYPHER

Ride with No Boundaries

Wide Rim

The 25mm internal width is optimized for modern wide tires, providing a rounder profile and greater air volume. This allows you to run lower pressures for improved grip, comfort, and overall stability.

Constructed from a blend of Toray T700 and T800 carbon fibers, using advanced lay-up technology for a lighter, smoother ride. Impact resistance reaches up to 110J, more than double the UCI's minimum requirement of 45J for road wheels.

Upgraded from steel to T-shape carbon spokes, cutting weight by 120g while boosting stiffness and responsiveness.

New Hub Design

The new hub features a hardened steel ratchet for improved durability and smoother engagement, while also reducing spoke torsion for a more efficient power transfer.

D35

D45

Model	D35	D45
Appearance	Matt Black/Classic & Matte Black/White Decals	
Brake	Disc Brake	
Rim Material	Toray T700/T800 Carbon Fiber	
Weight	1290g	1328g
Rim Depth	35/35mm	45/45mm
Internal Width	25mm	
External Width	34mm	
Spoke Type	T-Lock Spoke Heads	
Spoke Count	Front: 21, Rear: 21	
Spoke Lacing	Front: 2:1, Rear: 2:1	
Bearings	Steel Bearings	
Hub Structure	Ratchet System (36T)	
Freehub	Shimano / XDR / CP / N3W / MS	
Tire Size	32-50mm	
Compatible Tire	Tubeless Ready	
Max Tire Pressure	80psi
