

G5

AERO GRAVEL RACER

Engineered for Speed.
Built to Dominate Every Terrain.

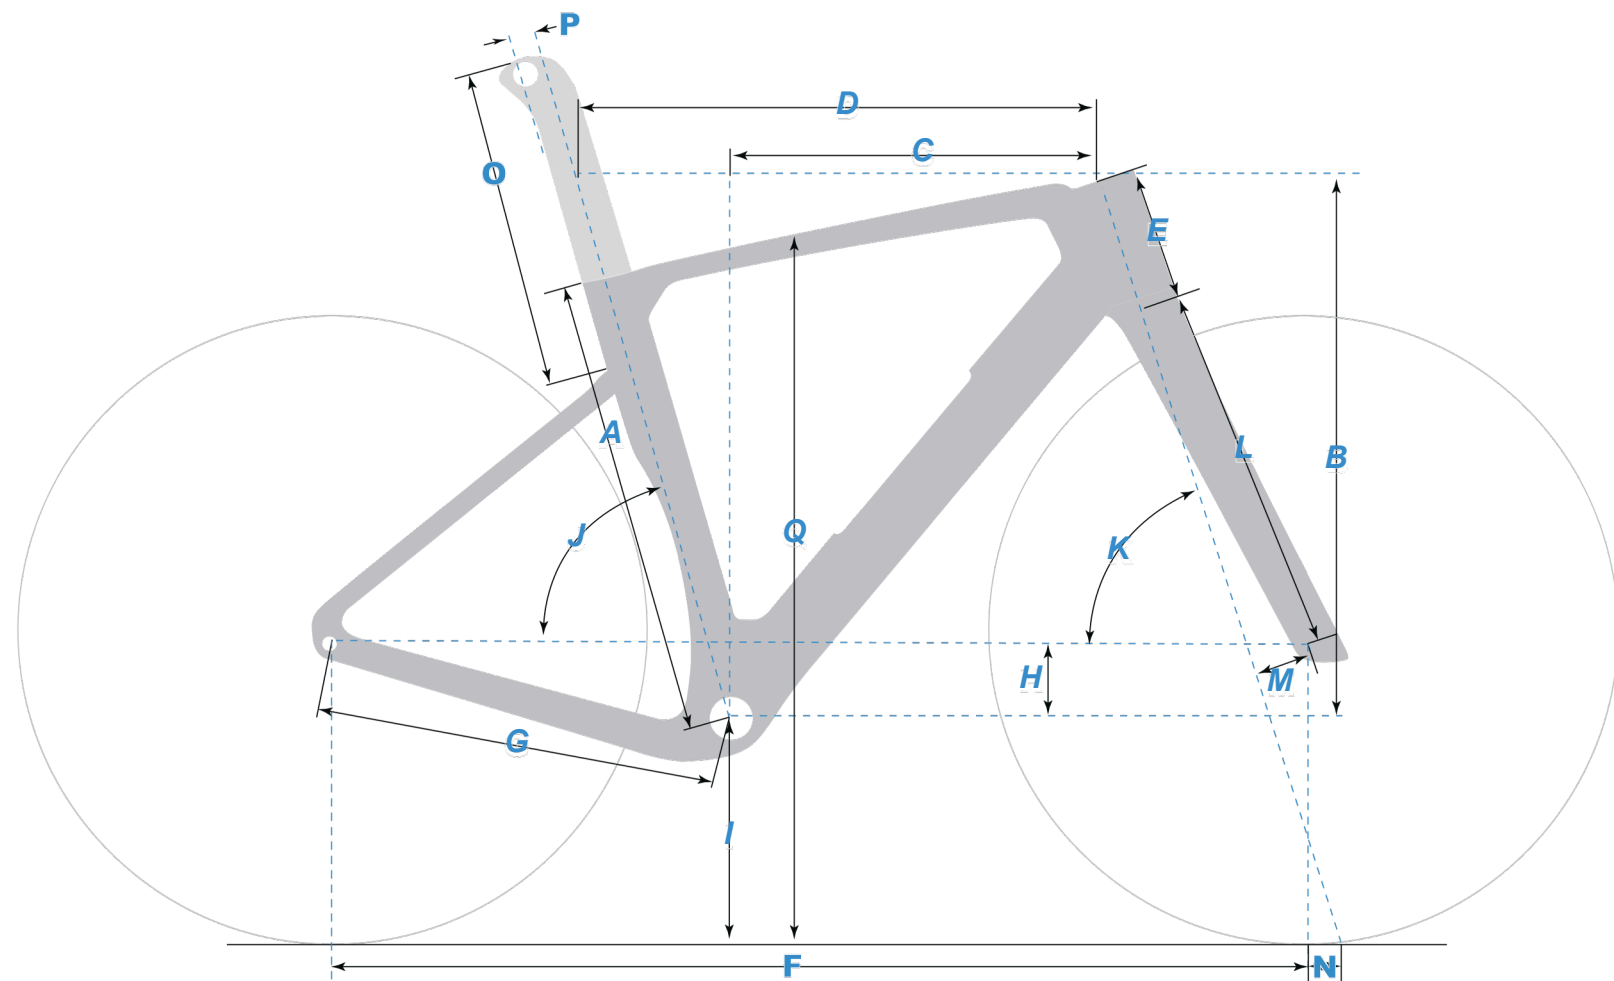

The Winspace G5 redefines what a gravel race bike can be. Building on the legendary success of our G3 platform, we have created a purebred aerodynamic racing machine that retains the uncompromising all-terrain capability gravel riders demand. Every tube, every junction, every detail has been optimized and proven on the world's toughest gravel courses.

For riders who refuse to choose between blistering speed on tarmac and unyielding confidence on rough backroads, the G5 delivers the ultimate balance of aerodynamic efficiency, race-winning stiffness, and long-distance comfort. This is the bike that will carry you to the podium at Gravel races and through the most epic multi-day adventures.

DESIGN PHILOSOPHY

		XS	S	M	L	XL	XXL
A	Seat Tube Length	440	460	480	510	540	570
B	Stack	531	544	561	578	598	619
